

Have you heard about the flu vaccine spray for kids?

FluMist—it goes in the nose.

No needle, no worry!

Just a quick spray in to each nostril helps protect your child from flu (influenza).

Free for kids aged 2 to 11 in WA.

FluMist is available now at your local doctor (GP) clinic, Aboriginal Medical Service (AMS), pharmacy or community health clinic.

Need more information?

Just ask at your local clinic if it's okay for your child or visit the Healthy WA website.
