

# Is it measles?

Measles is serious and it spreads to lots of people, real fast.

## Symptoms

Rash of red spots on face and body

Fever

Runny nose

Cough

Red, sore, watery eyes

AHCWA

# What to do if you think you have measles?

- wear a mask
- stay away from others to stop the spread
- get help—phone your clinic or hospital and tell them you might have measles before you attend

# Stop measles in its tracks.

Check you've had two measles vaccines. Go online at [myGov](#) or ask your clinic.

The measles vaccine is free for:

- kids at 12 and 18 months old
- adults born after 1965 who haven't had two measles vaccinations

# Keep your mob safe.

The more people who are  
vaccinated for measles,  
the safer your mob will be.

Talk to your clinic for  
more information.
